PROJECTS

Currency Converter Website

February 2023

- This is a currency convertor project I created while following along the #chaiaurcode course named "Chai aur React" taught by Hitesh Choudhary. Got to learn many new concepts in react, new APIs and also hosting on #netlify .
- Source code link: <https://github.com/Hrshl-Gunjal/currency-converter-react>
- Front-end:-----> Reactjs, HTML, CSS, Javascript CSS Framework:----> Tailwind CSS Back-end:-----> NodeJs, ExpressJs API:-----> <https://cdn.jsdelivr.net/gh/fawazahmed0/currency-api@1/latest/currencies/{currency}.json>

Translate On Select Chrome Extension

January 2024

- This is a chrome extension I made which translates any selected text to your preferred language. Made using HTML, CSS and Javascript (Frontend) and Nodejs (Backend). This extension uses the free and open source API named Libretranslate API.
- Link to API: <https://github.com/LibreTranslate/LibreTranslate>
- Link to My Project Code: <https://github.com/harshalgunjal69/Translate-On-Select-Chrome-Extension>

QR Code Generator Website

August 2023

- On this website you can turn any Data like textx, links, etc into a sharable QR Code. It is made using HTML, CSS (Bootstrap) and Javascript (for Frontend) and Flask (for Backend). I have made use of the qrcode python library.
- Link to the source code: https://github.com/harshalgunjal69/QR_Code_Generator_Website

Portfolio Website

July 2023

- This is a portfolio website that I created for myself. I used HTML, CSS, Javascript and the Bootstrap framework for this website. It is a well designed website with animations and many more amazing functionalities. Do check it out.
